London May 25th 1857.

Sir)

Hearing I introduced certain Calculations To The Hon^ble Directors of the Eastern Steam Navigation Company respecting Improved propulsive Apparatus And are given to understand are Surrended for Inspection &c. And hope Mr Brunell as Chief Engineer will Deliberately Examine the Merits or Demerits of the subject, I have Taken much pains to Explain the true Tendancies in the most simple manner to the Extent of my Abilities relative to the propulsive Only — Wish not any with to preclude the weels now Constructing; But the parts Selected for Scrutiny are very Obvious, The Advantages & Disadvantages the well Known & Easy Calculated, I am quite aware Your anxiety Invocation produces much & Steady on with Extensive Arrangements without the present Interference But the Importance of Reducing those Unnecessary Obstructions which Act against the propelling power Must Increase Speed. and by that Decrease Expense

This Singular Introduction Requires no Alteration in either the Boilers or Machinery whatever Or Injury other Vessels the proportion be what it may,

I Am quite Satisfied the Investigation Is In Scotch Able Hands, And Can Only Add That I Will Most Obediently Attend to All requisitions requested to Give the the Object wherein Every Confidence may be placed Most Respectfully

By Your very Obedient & Humble Servt

J. Mold
